

# Decorative Hinge Straps

## INSTALLATION INSTRUCTIONS

Please review ALL diagrams and instructions in full prior to beginning installation.

PREDRILL FOR SCREWS TO  
PREVENT SPLITTING

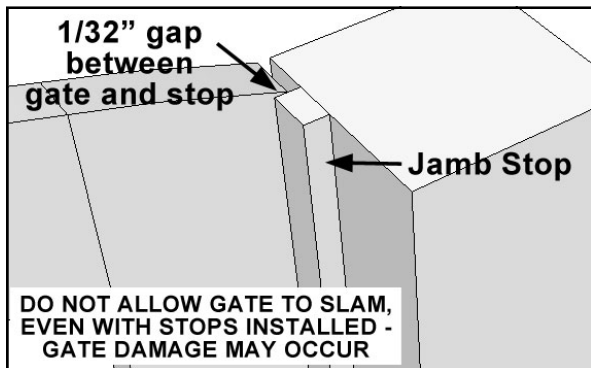

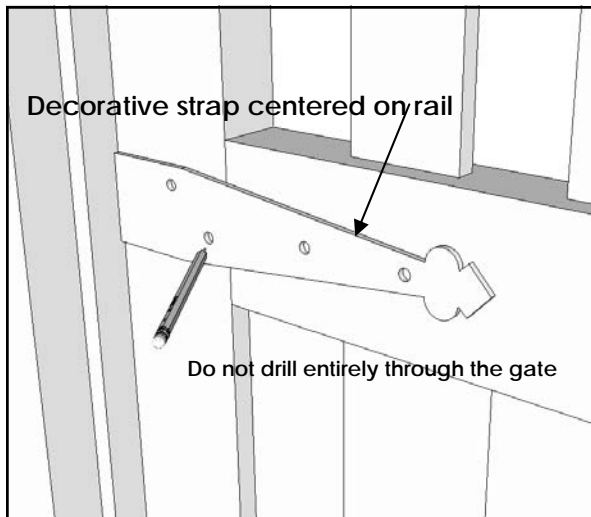

1/4" BIT FOR HEX HEAD BOLTS

### DECORATIVE STRAP INSTALLATION

*Install decorative straps after gate and hinges are installed.*

- 1) With gate installed and in closed position, position strap in desired location (typically centered on the horizontal rails). When positioning decorative straps, be sure that screw holes will not interfere with existing screws from functional straps. If conflict is possible offset the decorative hinge slightly.
- 2) Mark each screw hole with a pencil. See Fig. B.
- 3) Pre-drill each marked hole location. Mount straps to gate using hex head screws provided. Do not over tighten. Take care not to scratch powder coating.

### STOP INSTALLATION

*Failure to install gate stops will void warranties.*

- 1) Cut stop to be at least as long as the gate's edge height.
- 2) Mount stops to posts (or jambs, if applicable) using screws and/or weatherproof wood glue (such as Titebond III). Position stop with 1/32" gap between face of gate and stop when gate is closed.
