

# DIY Fence Panel Kit - 35in & 70in Kits

## INSTALLATION INSTRUCTIONS

Please review ALL diagrams and instructions in full prior to beginning installation.

**IMPORTANT NOTE:** The Fence Panel Kit is designed to be installed between two posts (**NOT** included). Steel or wood posts can be used. Note: Kit includes wood screws only.

**In your Fence Panel Kit, you should have received the following materials:**

- (2) Top/Bottom Rail
- (6) Panel Mounting Bracket and (24) Flat Head Wood Screws
- (1) Middle Rail
- 47" Tongue and Groove (TNG) Slats for Bottom Panel
- 35" Tongue and Groove (TNG) Slats for Top Panel
- (24) #12, 1-1/2" Flathead Wood Screws

### FENCE PANEL KIT INSTALLATION

*Cut to fit to create custom heights and widths (max: 96-1/2" x 35"W or 70"W).  
Install between wood posts / jambs—NOT included*

- Sealing the boards may be done before or after assembling the panels. If done before, more of the wood surface will be protected and/or stained (for example, the end grain, tongue, and groove).

- 1) Set posts to desired spacing. Cut each rail to match the space between each of the posts.
- 2) To achieve the desired overall panel height and middle rail height, the TNG slats can be customized for length by cutting them down. Note: Each slat has a 1/2" slot for the TNG to sit in.
- 3) Attach the bottom rail with (2) brackets and screws. Pre-drill the screw hole with an 1/8 inch diameter drill bit.
- 4) Begin laying out the TNG slats within the bottom rail slot. It is recommended that the slat boards at each end are not less than 1-1/2 inch wide.
- 5) Working from the center outward, put the TNG boards for the bottom panel in the slot. Saw the end TNG boards so that they are even in width. Note: Remember to account for the TNG 'tongue' when determining the proper board width.
- 6) Slide the Middle Rail over the tops of the TNG slats and attach to the wood posts using (2) Panel Mounting Brackets.
- 7) Repeat Step 4 for the TNG Slat Top Panel, sliding all TNG slats into the groove in the top of the Middle Rail.
- 8) When the slats are to the desired look, slide the Top Rail over the slats and attach the Top Rail to the wood posts using the last (2) Panel Mounting Brackets.
